Work Experience

LunaDev (Software Developer)

January 2021-Present

RennSport

- Built a cross platform mobile application in Flutter for a local Orlando company.
- Developed Mobile Application in Flutter for RennSport Collection
 - Built multiple front end screens and models with Dart and used Provider as our state management.
- Consulted and worked with clients to build the application to their criteria they envisioned.
- iOS and Android applications are being developed in Flutter with MongoDB databases.
 - Technologies used Dart, Provider, MongoDB, Stripe, Node.js.

Moolah

- Developed the frontend for Moolah a personal finance tracker app.
 - Built multiple widgets and screens with Dart, created a usable SfCalender for users to see what upcoming payments they have.
 - Technologies used Dart, Bloc, Getx, Firebase, Node.js.

Personal Projects

GetMyDrink

- Ecommerce ordering app, creating a seamless Ui for customers to order items from, creating the application in a way for it to be easily reused and easy to add widgets and functions when needed.
- Created a clear and concise reward point system created and designed myself.
- Creating virtual cards that customers can reload money on to order user items.
 - Technologies used are Dart/Flutter, Bloc, Firebase, and Stripe.

Skills

- Dart/Flutter
- MongoDB
- FireBase
