

HI, I'M JEFF

I specialize in product strategy and engineering leadership for startups and hyper-growth companies that want to build, launch, and rapidly iterate mobile apps and cloud-native products.

I approach work from the perspective that technology should solve important problems, increase the quality of life, and do so in an engaging and enjoyable way. I am most satisfied when working on challenging, high-value issues with people who deeply care about their work.

I rely on my experience as a principal software engineer and product manager, which provides a solid platform for leadership and mentoring. I have expertise in Flutter, IOS, cloud-native architectures, Agile methodologies, product strategy, and leadership.

My work is complemented by an active personal life centered around family adventures, many of which are outdoors, either around Naples, where we live or in the Rocky Mountains, where we occasionally travel during the summer. I also enjoy tooling on German-engineered automobiles, riding motorcycles, and paddle-boarding.

I look forward to bringing my leadership, enthusiasm, and technical expertise to your organization.

A handwritten signature in black ink, appearing to read 'Jeff Ziegler'.

JEFF HIGHAM

Principal Software Engineer
Flutter · iOS · React
